

Waste water treatment

Vietnam, 12m³/h

Aim of the Project

Lenntech has engineered, manufactured and assembled reverse osmosis (RO) with cleaning in place (CIP) system on skid to treat waste water. The main challenge was the changing feed water quality on site, therefore the design had to be sufficiently flexible to balance the treatment and deliver correct quality of permeate.

Scope of Work

- ✓ Engineering, manufacturing and assembly
- ✓ Skid mounted RO system
- ✓ Cartridge filtration
- ✓ Antiscalant dosing
- ✓ Complete control system

Plant specs

- ☐ Feed water quality
- Waste water

Project duration

- ☐ April to August 2021
