Scale Inhibitor ROPUR RPI-4500A

GENERAL

**RPI-4500A** is specially designed to inhibit the scale formation in RO-systems equipped with polyamide-, celluloseacetate- and polyethermembranes with anionically charged surface.

**RPI-4500A** is a stabilized solution of organic phosphonates and polyacrylates.

**RPI-4500A** is most effective against sulphate scale of calcium, strontium and barium as well as calcium carbonate scales. The contained polymers effectively prevent the formation of silicate scale.

APPLICATION AND DOSAGE

**RPI-4500A** is designed and approved as a highly efficient scale inhibitor for use with cellulose acetate and polyamide membranes. There is no interaction with the membrane material.

The dosage is controlled proportionally to the feed water flow. Standard metering pumps are used. Fitting materials are PE, PP or coated steel. In order to avoid biological fouling, the containers have to be cleaned from time to time with a 10 % sodium bisulphate solution.

**RPI-4500A** can be diluted with water in any ratio. However, it is recommended to inject the antiscalant undiluted or as solution up to 10 %. The diluted solutions have to be consumed within 48 hours after preparation. The required dosage level depends on the operating conditions and water composition and varies in the range of 1 – 8 ppm as delivered.

**RPI-4500A** is easy to be handled and does not contain any aggressive component. The pH value of the product is slightly acidic.

PHYSICAL PROPERTIES

- **Appearance:** clear, slightly yellow liquid
- **Density:** 1.14 – 1.17 g/cm³
- **pH-value:** 4.0 – 4.3
- **Freezing point:** -10°C
- **Boiling point/boiling range:** 100 – 105°C
- **Solubility in water:** unlimited

Comply with EU regulations CEN/TS 164, EN 15039 and EN 15040 used for treatment of water intended for human consumption
STORAGE & HANDLING

RPI-4500A is not classified as a hazardous chemical (GGVE/GGVS, ICOA/IATA). Standard regulations and precautions when dealing with chemical products have to be followed.

RPI-4500A is easy to store. The storage temperature should be between +2 °C and 35 °C. The product is supplied in containers suitable for air or sea transportation.
