1. Membrane Type
   Cross Linked Fully Aromatic Polyamide Composite

2. Test Conditions
   - Feed Water Pressure: 800 psi (5.52 MPa)
   - Feed Water Temperature: 77°F (25°C)
   - Feed Water Concentration: 32,000 mg/l NaCl
   - Recovery Rate: 8%
   - Feed Water pH: 8

3. Minimum Salt Rejection
   99.5%

4. Minimum Product Flow Rate
   - 10,400 gpd (39.4 m³/d) (TM820L-400)
   - 11,500 gpd (43.5 m³/d) (TM820L-440)

5. Boron Rejection (typical value)
   92% at pH 8 (5 mg/l Boron added to Feed water)

Dimensions

All dimensions shown in Inches (millimeter).

Feed Water

Concentrated Brine

Flow direction

TM820L-400

TM820L-440

Operating Limits

1. For the recommended design range, please consult the latest Toray technical bulletin, design guidelines, computer design program, and/or call an application specialist. If the operating limits given in this Product Information Bulletin are not strictly followed, the Limited Warranty will be null and void.

2. All elements are wet tested, treated with tested feed water solution, and then vacuum packed in oxygen barrier bags with deoxidant inside. To prevent biological growth during system shutdown, it is recommended to perform 30-60 minutes flushing of Toray elements with seawater once in every two days.

3. The presence of free chlorine and other oxidizing agents under certain conditions, such as heavy metals which acts as oxidation catalyst in the feed water will cause unexpected oxidation of the membrane. It is strongly recommended to remove these oxidizing agents contained in feed water before operating RO system.

4. Permeate from the first hour of operation shall be discarded.

5. The customer is fully responsible for the effects of chemicals that are incompatible with the elements. Their use will void the element Limited Warranty.

Notice

1. Toray accepts no responsibility for results obtained by the application of this information or the safety or suitability of Toray’s products, either alone or in combination with other products. Users are advised to make their own tests to determine the safety and suitability of each product combination for their own purposes.

2. All data may change without prior notice, due to technical modifications or production changes.
