

Greenhouse water desalination

Ethiopia, 1.500 m³/d

Project Description:

Lenntech has been awarded a contract for the engineering, manufacturing and assembly for reverse osmosis systems for a grower in the Democratic Republic of Ethiopia. The treated and desalinated water is used as process water for a horticultural application. The water desalination system is equipped with top brand instrumentation and equipment. The system is completely from European origin and will be delivered with a certificate of origin.

Scope of Work:

- Engineering, manufacturing and assembly
- Chemical dosing stations
- Multimedia filtration
- 5 micron cartridge filtration
- Reverse osmosis system
- Post RO treatment system
- Automated flush
- Microprocessor controlled
- Site commissioning and installation supervision

Project duration:

February 2014 to September 2014

Project location:

Democratic Republic of Ethiopia

Product quality:

TDS < 200 µS/cm

Project application:

Potable and horticultural water

Typical contract amount:

80.000 – 170.000 EUR
